

Satin Crystal vinyl featuring Spandex's "PerfectApply" technology and a permanent adhesive. This material has been specifically designed for digital printing on large-format inkjets and is suitable for printing with eco solvent and solvent inks as well as UV-cured inks.

## IP 2515PA

IP 2515PA is a clear matt glass decorative vinyl, suitable for use on a wide variety of clean, dry surfaces and incorporates Spandex's "PerfectApply", bubble-free technology to facilitate application. IP 2515PA has been formulated to promote medium-term, exterior durability, whilst the liner has been engineered to deliver outstanding lay flat properties. The product may be used in most interior applications and many exterior decorative and display applications where an etched glass or matt effect is required on a glass substrate, primarily for window decoration. Laminate: IP 2810-200 or ImagePerfect™ water-based liquid laminate with UV protection.
