

Using the extrusion key

Bannerblock

Bannerblock is THE profile for mounting digital prints. It holds securely media from as thin as 0.2mm making it ideal for use with paper, PVC banner and mesh, textiles and even semi rigid materials such as sheet polycarbonate.

A silver anodised aluminium extrusion clamps the full length of your prints to offer a simple and easy to use display solution. Choose between complete sets in most of the common sizes or order by the extrusion and simply cut to the desired length.

Versatile display system

- Bannerblock is ideal for mounting digital prints to single or modular cable systems
- In conjunction with the Fly range you can easily integrate Bannerblock into most cable systems
- Mount the extrusions with sidefix to the cable
- Keys are available that make opening the profile convenient
- Accommodates a media thickness from 0.2mm up to 0.7mm
- End caps fitted with stainless steel screws give added security
- Prints can quickly be changed when required

Bannerblock is ideal for

- Digital graphic displays
- Promotional displays
- Information systems
- Retail advertising and displays
- Window displays

Spandex Sign and Display Systems are the preferred choice of architects, designers and signmakers worldwide
