

Fly Bullet

Fly Brace

The Fly Design cable system is the elegant way to suspend your information.

It offers shapely supports for walls, ceilings, cables, panels and shelves with highly designed components showing a superior degree of workmanship. The Fly Design cable system adds a stylish look when used within shop window displays or integrated as part of the office furnishings.

A unique look

The Fly Design cable system is a top of the range product made from very high quality materials. An elegant, highly designed cable system offering a unique look for wall and ceiling supports, cable, panels and shelves.

- Cables are made from PVC coated galvanised steel
- Fixing components are made from brass making them highly corrosive resistant
- Easy to use - the display systems are designed to ensure quick fitting and assembly
- Maximum cable diameter up to 2mm
- Lateral panel supports are available for single and double panels, maximum panel thickness up to 10mm
- Very flexible - the system can be adapted and changed a variety of times to give a number of different looks

The Fly Design cable system is ideal for

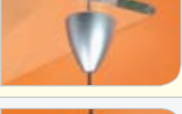

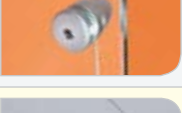

- Retail window advertising
- Retail furniture
- Window displays
- Poster displays
- Directional signage
- Information displays
- Travel agents and estate agents window displays

Spandex Sign and Display Systems are the preferred choice of architects, designers and signmakers worldwide
