

Fly Pin &amp; Pair

Fly Universmini

The Fly Mini cable system is a simple, easy to use range with all the basic components needed for creating effective cable displays.

The range offers supports for walls, ceilings, cables, panels and posters with each key component showing a high degree of workmanship. The Fly Mini cable system adds a stylish look when used within shop window displays or integrated as part of the office furnishings.

#### Compact and discreet

The Fly Mini cable system has the fundamental requirements to create compact and discreet cable displays. All essential needs are covered.

- Cables are made from PVC coated galvanised steel
- Fixing components are made from brass making them highly corrosive resistant
- Easy to use - the display systems are designed to ensure quick fitting and assembly
- Maximum cable diameter up to 2mm
- Lateral panel supports are available for single and double panels, maximum panel thickness up to 3mm
- Very flexible - the system can be adapted and changed a variety of times to give a number of different looks
- Double sided panel suspension available

#### The Fly Mini cable system is ideal for

- Retail window advertising
- Retail furniture
- Window displays
- Poster displays
- Directional signage
- Information displays
- Travel agents and estate agents window displays
